CLOUD SOLUTION TECHNOLOGY

Cloud Technology Management

- Server Virtualization & Consolidation
- Cloud Transformation
- Cloud Management Solution
- Private & Public Cloud Migration
- Integrate Private Cloud & Public Cloud
- Hybrid Cloud Management

Cloud Technology] - Terminology

Cloud Computing is a general term used to describe a newclass of network based computing that takes place over the Intranet/Internet

- basically a step on from Utility Computing
- a collection/group of integrated and networked hardware, software and Internet infrastructure (called a platform).
- Using the Network Intranet/Internet for communication and transport provides hardware, software and networking services to clients

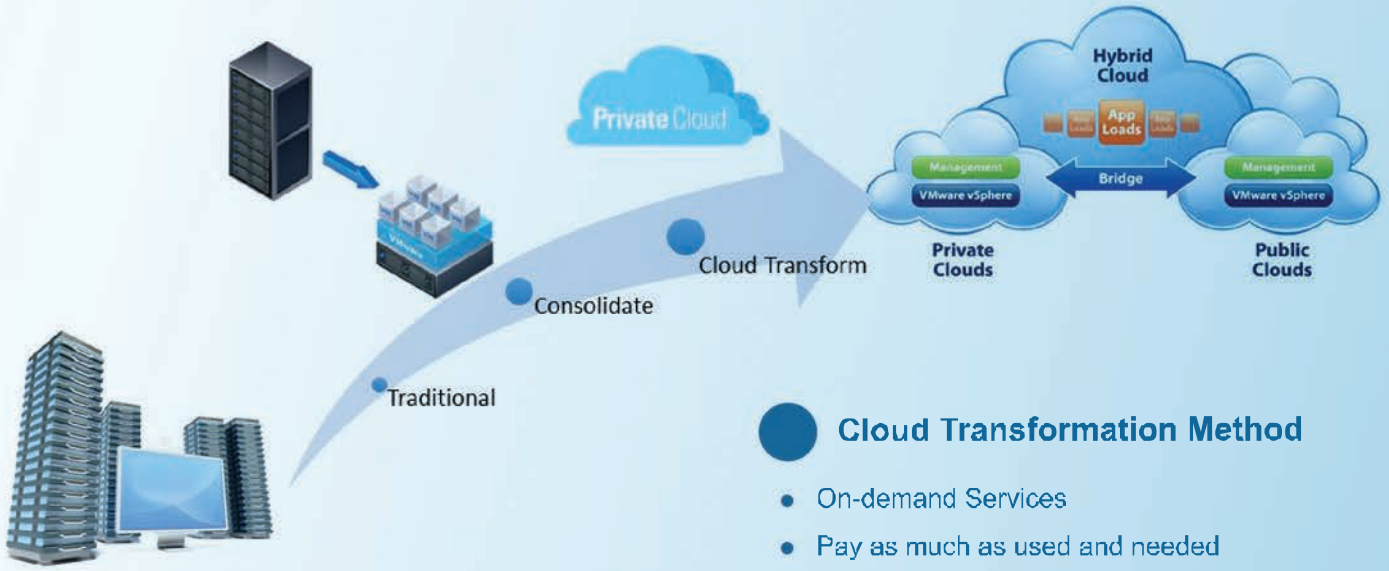
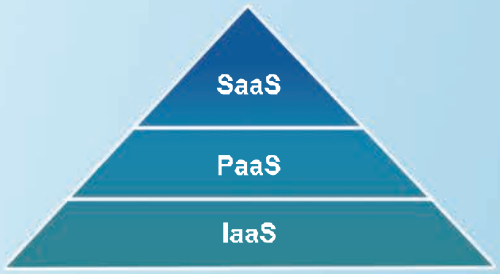
Cloud Technology Transformation



Cloud Transformation Method

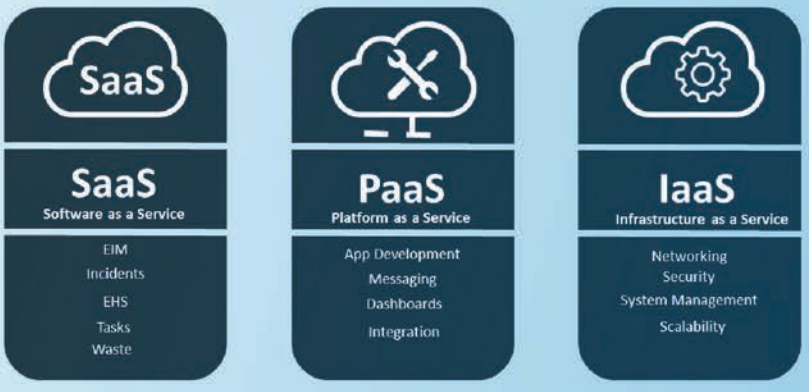
- On-demand Services
- Pay as much as used and needed
- Always on, Anytime and Anyplace
- Scale up and down capacity and functionality
- Hardware & Software available to used

Cloud Service Model



Cloud Service Model

- On-demand Services
- Pay as much as used and needed
- Always on, Anytime and Anyplace
- Scale up and down capacity and functionality
- Hardware & Software available to used



- **SaaS - Software as a Service**
  Cloud Service Provider has a full Control over cloud and software Manufacturing organization rents software applications

- **PaaS - Platform as a Service**
  Cloud Service Provider Provides Infrastructure and development platform Manufacturing organization can develop its own software applications

- **IaaS - Platform as a Service**
  Cloud Service Provider Provides Infrastructure and resources Manufacturing organization manages OS, data and software applications

Service Model Changes

Cloud Technology Summary

Characteristics

- Measured Service
- Rapid Elasticity
- On Demand Self Service
- Broad Network Access
- Resource Pooling

Service Models

- Software as a Service (SaaS)
- Platform as a Service (PaaS)
- Abstract Service / APIs
- Infrastructure as a Service (IaaS)

Benefits

- Cost Savings
- Focus on Core Business
- Ease of Implementation
- Flexibility
- Scalability

Deployment Models

- Public
- Private
- Hybrid (use of more than one model)
- Community
